

# ANNOUNCING The Southern Pacific “Black Widow” Train Set

## BUILT EXCLUSIVELY FOR THE LCCA BY LIONEL

The Lionel Collectors Club of America is proud to announce a very special and exclusive Lionel train set for our members. This is the first train set offered to the LCCA membership since 2013, and it is a state-of-the-art set with all the bells and whistles collectors and operators expect from Lionel.

Starting with the lively livery of the Black Widow® diesel engine, the bold black, red, orange and silver colors continue through the three passenger cars. The train features Bluetooth electronics to allow operation with a cell phone via the LionChief® app and/or a universal remote (sold separately). The set includes a LionChief remote. It also features RailSounds® and Lionel Voice Control. And the engine and three cars are all presented in a very special LCCA box.\*

The 13 inch long FT diesel will operate on an O31 curve or larger, and features include operating headlight and illuminated interior cab light, operating couplers, and silver die-cast metal trucks. The SP Black Widow

passenger cars carry the historically accurate names of three famous past railroad presidents — the Crocker Coach, the Phelps Dome car and the Hopkins observation car. The three 13 inch long passenger cars have interior illumination, soft-molded diaphragms between cars, silver die-cast metal trucks, operating couplers, and will run on a minimum of O27 curve track.

So, order your SP Black Widow LCCA/Lionel train set now before they are gone. The set is priced at \$430, shipping is included and the set is only available to LCCA members. You can order on the LCCA website store or by calling the LCCA business office during regular business hours. Limit three sets per member.

*\*Set does not include transformer, remote control or track.*
